PROFILE

Second-year B.Tech Computer Science student working toward a career in data science and applied machine learning, with a first-year CGPA of 9.81. Comfortable across the full workflow of a small ML project: sourcing and cleaning data, training and tuning models, and interpreting results. Seeking an internship where I can contribute to real data problems and learn from an engineering team.

EDUCATION

B.Tech, Computer Science and Engineering

2025 - 2029

Pimpri Chinchwad University (PCU), Pune

First Year CGPA: 9.81 / 10

Relevant coursework: Object-Oriented Programming (C++), Data Structures, Discrete Mathematics, Logic Building.

Higher Secondary (XII) and Secondary (X), CBSE

Completed 2024

Shri Guru Tegh Bahadur Academy, Ratlam

Class XII: 75.4% | Class X: 81.4%

EXPERIENCE

Machine Learning Intern, Samartha Mauli Healthcare LLP

Feb 2026 - Mar 2026

- Two-month internship focused on applied machine learning for healthcare data.
- Built and validated the Ayurvedic Lifestyle & Diabetes Prediction model (see Projects) as the core deliverable of the internship.

PROJECTS

Ayurvedic Lifestyle & Diabetes Prediction

Python, scikit-learn, Google Colab

- Built a supervised learning model that predicts diabetes risk from lifestyle and dietary indicators drawn from Ayurvedic classification of daily routine.
- Curated and cleaned a complex lifestyle dataset, handling missing values, inconsistent categories and class imbalance before training.
- Ran iterative feature selection and hyperparameter tuning to raise predictive accuracy over the baseline model.
- Developed and documented the work in Google Colab for reproducible, environment-consistent execution.

Additional projects

[Space reserved — add a second project here as you build it. A small end-to-end project with a public GitHub repository is the single strongest addition to this CV.]

TECHNICAL SKILLS

Languages Python (primary), C++, C

ML & Data Data pre-processing, feature engineering, predictive modelling, model tuning, evaluation metrics, AI ethics

Tools Google Colab, Jupyter Notebook, Git (basic), Claude AI for code review and logic optimisation

Concepts Object-oriented programming, data structures, algorithm analysis, data collection strategy

Learning now Agentic AI systems, deep learning fundamentals

CERTIFICATIONS & COURSES

Data Science Professional Certification

Completed

Complete Data Scientist course — Udemy: applied statistics, Python for data analysis, and machine learning workflows.	
Hands-On Introduction: Python	<i>Completed</i>
LinkedIn Learning: introductory hands-on Python programming.	
Python Projects	<i>Completed</i>
LinkedIn Learning: applied Python through hands-on software projects.	
Determining Your Cloud Strategy: Planning for Roadmap, Infrastructure, and Deployment	<i>Completed</i>
LinkedIn Learning: cloud strategy, deployment planning and infrastructure.	

ADDITIONAL INFORMATION

Languages: English, Hindi

Interests: Applied AI in healthcare, Ayurveda and preventive health, competitive programming practice
